ARCHITECTURAL SPECIFICATION INFORMATION

#615: PlateGrip™ Embed Plate Holder

PLATEGRIP™

Simple – Fast - Strong

The PlateGrip™ is a fast efficient way to hold an embed plate in place. PlateGrip™ works on all common size CMU. Easily vibrates around the studs without blowout or plate displacement. It does not interfere with reinforcing.

ADVANTAGES

- Cost effective
- Saves Time
- Eliminates Costly Deficiencies
- Complete grout consolidation
- No precise cut needed
- Multiple uses
(jamb channels and continuous plates)
- One man installation
- Immediate grout placement
- No tie wire or epoxy needed
- Works in all 360 degree positions

Not just an accessory ... A **TOOL** to make plate installation faster, easier and more successful.

PlateGrip™ Installation

The PlateGrip™ is available in Electro Galvanized, Hot Dip Galvanized or Stainless Steel finishes to meet or exceed structural and code requirements.

Standard Sizes and Catalog Numbers 1/2" and 5/8" Diameter Studs

		Catalog Numbers		
Wire Gage	Stud Length	Electro Galv	Hotdip Galv	Stainless
9 ga	4"	6154G9	6154H9	6154S9
10 ga	4"	6154G10	6154H10	6154S10
9 ga	5"	6155G9	6155H9	6155S9
10 ga	5"	6155G10	6155H10	6155S10
9 ga	6"	6156G9	6156H9	6156S9
10 ga	6"	6156G10	6156H10	6156S10
9 ga	7"	6157G9	6157H9	6157S9
9 ga	8"	6158G9	6158H9	6158S9

Custom sizes and shapes available for special applications.

WORKS WITH:

- square cuts or core drilled holes
- Any size or thickness plate
- Continuous shear plates of any length

Made in the USA
