

Cell vents are installed in the bottom vertical mortar joint of a brick veneer wall. It consists of many small adjacent passageways, which allows moisture to vent from the cavity to the exterior of the building while restricting ingress of insects. The cellular composition provides easy drainage for moisture along the full height of the head joint. Manufactured from polypropylene. Cell vents are UV resistant and tested in conformance to ASTM D2240, D790B, D638 and D 1238B. The TMS402 Building Code requires weeps be spaced less than 33" on center.

Standards:

Catalog Number	Size
85-JA	Jumbo 3/8 x 3-3/8 x 3-3/8 Almond
85-JB	Jumbo 3/8 x 3-3/8 x 3-3/8 Brown
85-JC	Jumbo 3/8 x 3-3/8 x 3-3/8 Clear
85-JG	Jumbo 3/8 x 3-3/8 x 3-3/8 Gray
85-RA	Regular 3/8 x 2-1/2 x 3-3/8 Almond
85-RB	Regular 3/8 x 2-1/2 x 3-3/8 Brown
85-RC	Regular 3/8 x 2-1/2 x 3-3/8 Clear
85-RG	Regular 3/8 x 2-1/2 x 3-3/8 Gray
