The Heckmann Composite Resin Thermal Clip, when attached to a Heckmann Pos-I-Tie® barrel, will provide a pullout load exceeding 500 pounds failure. This test was a pullout of the wire tie from the thermal clip only. It did not take into consideration the pullout of the threaded screw from the backup. Additional tests of the Pos-I-Tie® system with different wall conditions can be found on our website at www.heckmannanchors.com.
